

Integrated 'Ridge to Reef' Management

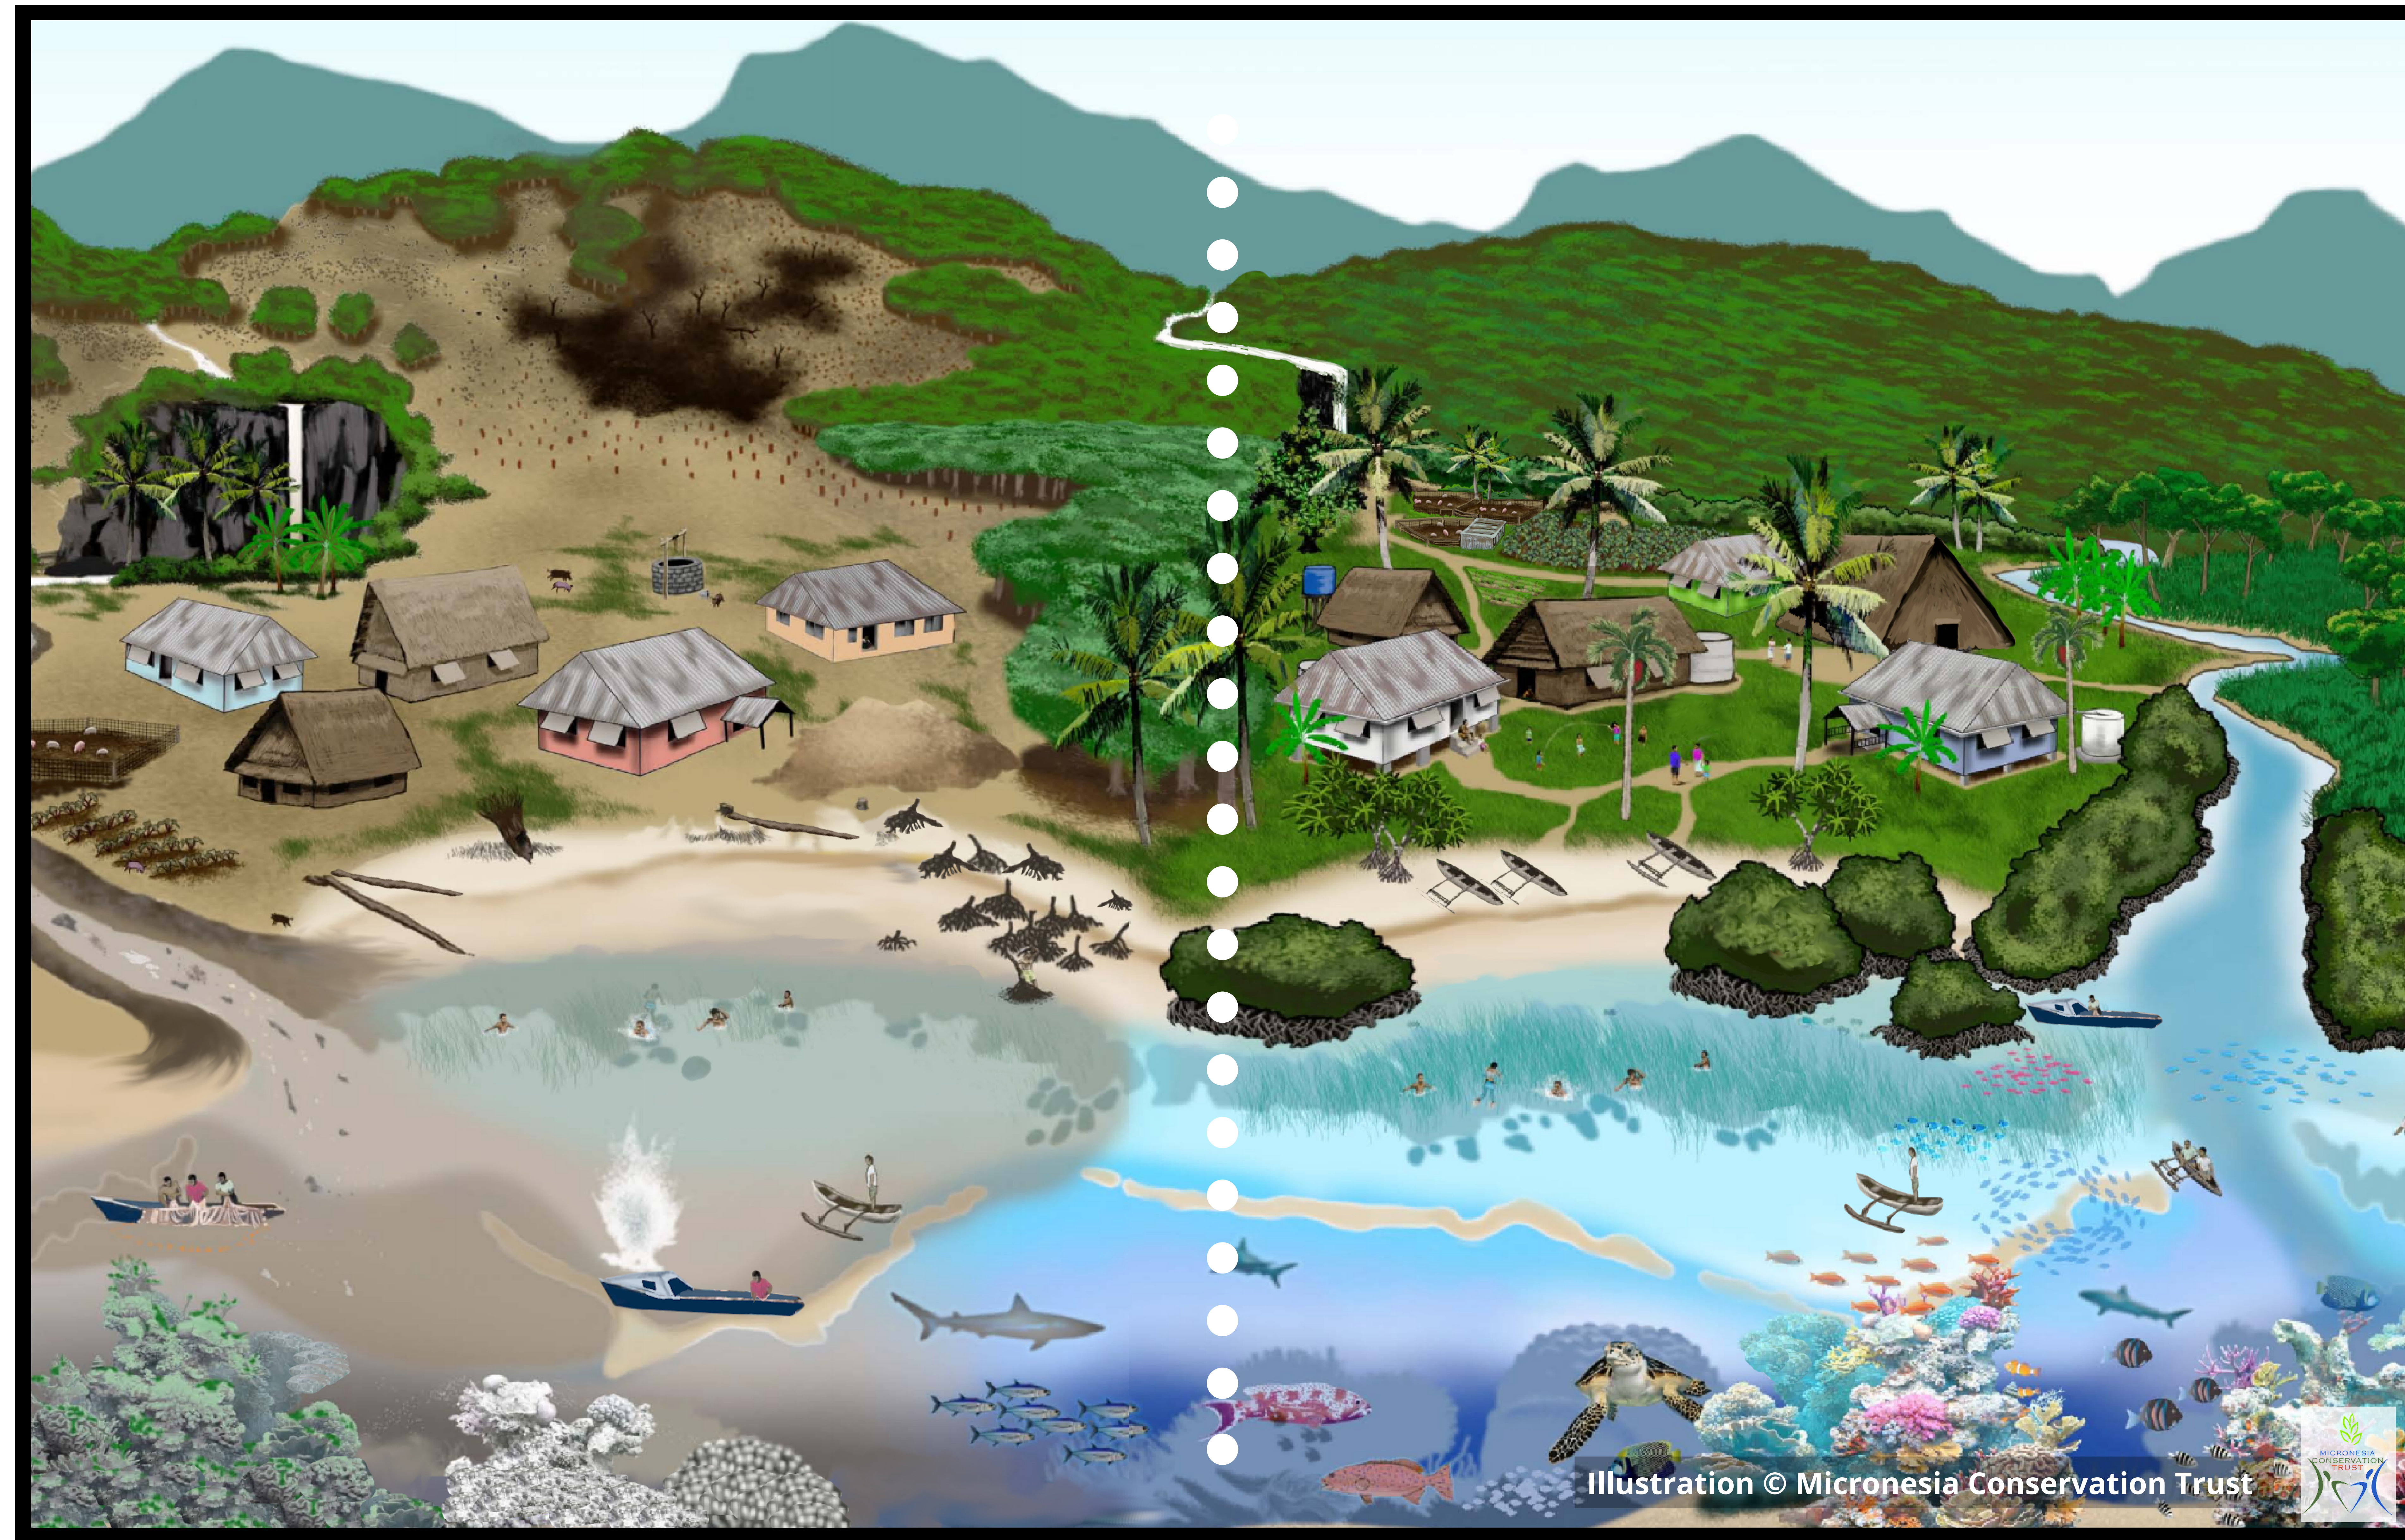

is vital in helping protect the wildlife and natural resources that people rely on for their livelihoods and well-being

Unsustainable forest clearance and agricultural practices

Poorly managed livestock and human waste

Mangrove deforestation, sand and coral mining destroy important fish habitats

Over-fishing and destructive fishing practices

Forested catchments and sustainable agricultural practices

Well-managed livestock and human waste

Healthy mangroves, seagrass beds and coral reefs support healthy fish stocks and marine wildlife

Sustainable fisheries
